

Jari Tynkkynen

Senior Test Automation Engineer

Address: Sudenkorento 2, 40950 Muurame, Finland

Phone: +358 45 653 5235

Email: jari.tynkkynen@elisanet.fi

Profile

Experienced test automation specialist and system developer with over 25 years of experience in automation, testing systems, and software testing. Specialized in test process development, automation architecture, and team leadership. Seeking a new software development and management related role.

Key Competencies

- Test Automation: Robot Framework, Jenkins, Azure DevOps, GitHub, Python, LabVIEW,
- AI base development and AI agent base of system development
- CI/CD: Azure DevOps, Jenkins
- Testing Strategies, test design, test management, test data
- and processes
- RF and Metrology Testing
- Simulation: MathWorks Simulink
- Electrical Design: E3
- Programming: Python, C#, Visual Basic, SQL, React
- Databases and Test Data Management
- Project Management and Team Leadership

Work Experience

Tech Service / Vivicta – Senior Test Automation Engineer (03/2023 – Present)

- AI base system development (full stack)
- Developed test automation architecture for a large-scale project
- Led a 5-person automation team
- Implemented REST API and frontend tests using Robot Framework
- Improved test development efficiency with various solutions
- Built test automation pipelines in Azure DevOps
- Developed simulation environments for location data and weight measurement for mobile machine applications
- Designed and executed testing strategies in collaboration with development teams

Q Factory – Test Automation Engineer (07/2022 – 03/2023)

- Developed test automation for a large public service using Robot Framework
- Designed and implemented automated tests for REST API and frontend layers
- Enhanced test efficiency and maintainability
- Collaborated with development teams to ensure quality assurance

Etteplan – Senior Test Engineer (02.09.2021 – Present)

- Designed and developed testing systems
- Worked in automation domain with focus on system-level testing solutions

Valtra – Senior SW Reliability Engineer (11.03.2019 – 01.09.2021)

- Developed functional software testing systems (Hardware-in-the-Loop)
- Managed testing system projects
- Modeled physical functionalities using MathWorks Simulink
- Executed tests via Jenkins
- Developed hardware drivers in Python
- Created tests with Robot Framework
- Designed electrical systems using E3
- Built sequence execution tools in Visual Basic

Landis+Gyr – Senior Testing Designer (22.02.2016 – 08.03.2019)

- Developed functional software testing systems using TestStand and LabVIEW
- Designed RF and metrology test system architecture and sequences
- Built result analysis tools in Visual Basic

Vision Development Oy – SW and Test System Specialist (22.04.2014 – 19.02.2016)

- Defined, implemented, tested, documented, and deployed automated production test systems
- Specialized in machine vision and stereo vision systems
- Developed test automation for mobile machines and energy measurement

- Used LabVIEW, databases, and Robot Framework

Ixonos Finland Oy – Senior SW Design Engineer (02.04.2012 – 21.04.2014)

- Designed RF and functional test systems
- Led design teams and testing activities
- Used LabVIEW, C#, VBA, SQL
- Worked with GSM, WCDMA, GPS, LTE, WLAN, BT systems
- Utilized Jenkins and Eggplant for software testing

Protacon Oy – Project Engineer (12.08.2009 – 30.03.2012)

- Designed measurement and information systems
- Led design teams and managed projects
- Used LabVIEW and Qt

Nokia Device – Senior Design Engineer, SW (01.09.2005 – 07.08.2009)

- Defined, designed, implemented, tested, and deployed automated RF test systems
- Responsible for sequencer architecture and algorithms
- Developed tests for GSM, WCDMA, FM RX/TX, GPS, WLAN, BT
- Used LabVIEW

Nokia Device – Testing SW Engineer (16.12.2002 – 31.08.2005)

- Maintained and developed RF and robot-assisted testing systems

Protacon Engineering Oy – Project Engineer (01.05.1997 – 15.12.2002)

- Developed measurement and data acquisition systems using LabVIEW

Education

- University of Jyväskylä – Information Technology (in progress)
- Jyväskylä Polytechnic – Bachelor of Engineering in Automation Technology
- Mänttä Vocational School – Mechanic, Electrical Power Technology

Certifications and Courses

- ISTQB® Certified Tester Foundation Level (CTFL) 4.0, completed 26.09.2025
- LabVIEW CLD
- Six Sigma Green Belt
- .NET Programming with C# and Visual Studio
- RF Measurements, GPS, DVB-H, WCDMA, HSDPA/HSUPA
- TestDirector, Cognex Image Vision, Synergy/CM
- Driver's License: ABe

Languages

- Finnish: Native
- English: Good (reading, writing, speaking)

Hobbies

- Body building
- Fishing
- Pizzas and cooking
- Tennis
- E-sports
