

About Me

A test automation specialist with a systematic and long-term mindset. Solves complex problems with calm, clear thinking. Works steadily and finishes what is started. Turns demanding requirements into reliable, high-quality solutions.

Skills

Test automation	
AI development	
Python	
Robot framework	
Test management	
RF test system	
Simulation system	
Testdata

Jari Tynkkynen

Test Automation specialist

Experienced test automation specialist and system developer with over 28 years of experience. Specialized in test process development, automation architecture, and team leadership. Seeking a new technical related role.

Education

BACHELOR OF AUTOMATION | 1994– 1998

Jyväskylä Polytechnic

MECHANIC, ELECTRICAL POWER | 1992–1994

Mänttä Vocational School

Experience Work

SENIOR TEST AUTOMATION ENGINEER

03/2023 – Now | Vivicta / Tech Service

AI-based full-stack development; test automation architecture; team lead (5); REST API & UI automation (Robot Framework, Postman); CI/CD in Azure DevOps; simulation development (location & weight); testing strategy execution with dev teams.

TEST AUTOMATION ENGINEER

07/2022 – 03/2023 | Q-Factory

Developed test automation for a major public service using Robot Framework, designing and implementing REST API and frontend tests while improving efficiency and maintainability through systematic enhancements. Worked closely with development teams to ensure consistent quality assurance.

SENIOR TEST ENGINEER

09/2021 – 07/2022 | Ettplan

Designed and developed advanced testing systems within the automation domain, focusing on system-level solutions that included high-speed measurement setups for embedded systems and RF test environments.

Certifications and Courses

- ISTQB® Certified Tester Foundation Level (CTFL) 4.0, completed 26.09.2025
- LabVIEW CLD (old)
- Driver's License: ABe

Languages

- Finnish: Native
- English: Good (reading, writing, speaking)

Hobbies

- Body building
- Fishing
- Pizzas and cooking
- Tennis
- E-sports
- Pizzas

SENIOR SW RELIABILITY ENGINEER

03/2019 – 09/2021 | Valtra

Developed HIL-based functional testing systems and managed related projects, modeling physical functionalities in Simulink and executing automated test flows via Jenkins. Created Python hardware drivers and Robot Framework tests, designed electrical systems with E3, and built sequence execution tools in Visual Basic to support comprehensive system-level verification.

SENIOR TESTING DESIGNER

02/2016 – 03/2019 | Landis+Gyr

Designed and developed functional software testing systems, created RF and metrology test system architectures and sequences, and built analysis tools to support reliable measurement and verification workflows.

SW AND TEST SYSTEM SPECIALIST

04/2014 – 02/2016 | Vision Development Oy

Defined, implemented, tested, documented and deployed automated production test systems, specializing in machine vision and stereo vision solutions. Developed test automation for mobile machines and energy measurement, using LabVIEW, databases and Robot Framework to support reliable and scalable testing workflows.

SENIOR SW DESIGN ENGINEER

03/2012 – 04/2014 | Ixonos Finland Oy

Designed RF and functional test systems while leading design teams and overseeing testing activities, working across multiple wireless technologies and ensuring structured, high-quality execution throughout system development and verification.

PROJECT ENGINEER

08/2009 – 03/2012 | Protaccon Oy

Designed measurement and information systems while leading design teams and managing projects, ensuring structured execution, clear coordination and successful delivery of complex technical solutions.

SENIOR DESIGN ENGINEER

12/2002 – 08/2009 | Nokia devices

Defined, designed, implemented and deployed automated RF test systems, taking responsibility for sequencer architecture and algorithms while developing tests across GSM, WCDMA, FM RX/TX, GPS, WLAN and BT technologies. Maintained and enhanced RF and robot-assisted testing systems, ensuring reliable operation and continuous improvement throughout system development and verification.
